

JAKARIA CHOWDHURY TAJWONE

MERN Stack Developer | Next.js Developer | Competitive Programmer

+880-1342-066856 | tajwone248tc@gmail.com | Sylhet, Bangladesh

[GitHub](#) | [LinkedIn](#) | [Portfolio](#) | [Codeforces](#)

PROFESSIONAL SUMMARY

Detail-oriented Computer Science Engineering student with strong expertise in full-stack web development using MERN stack and Next.js. Proven ability in building scalable, responsive applications with modern technologies including React.js, Node.js, Express.js, and MySQL. Competitive programmer with 550+ problems solved on Codeforces (max rating: 1183). Demonstrated proficiency in data structures, algorithms, and software engineering principles. Passionate about leveraging technology to solve real-world challenges with interests in Machine Learning, Artificial Intelligence, and Cybersecurity. Eager to contribute to innovative software development projects and gain hands-on industry experience.

EDUCATION

Bachelor of Science in Computer Science & Engineering

North East University Bangladesh | CGPA: 3.77/4.00

2023 – Present

Sylhet, Bangladesh

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Web Development, Software Engineering, Object-Oriented Programming

TECHNICAL SKILLS

Programming Languages: JavaScript (ES6+), C, C++, SQL

Frontend Technologies: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend Technologies: Node.js, Express.js, RESTful APIs

Databases: MySQL, MongoDB

Tools & Technologies: Git, GitHub, npm, Responsive Web Design

Core Competencies: Data Structures & Algorithms, Problem-Solving, Full-Stack Development, Team Collaboration, Communication

PROFESSIONAL EXPERIENCE

Frontend Developer Intern

Quadiz

August 2025 – October 2025

Remote

Contributed to frontend development projects using modern web technologies and frameworks

Collaborated with development team to implement responsive user interfaces and enhance user experience

Participated in code reviews and followed industry best practices for clean, maintainable code

CERTIFICATIONS & PROFESSIONAL TRAINING

Web Development Essential – EDGE Digital Skills Training

Bangladesh Computer Council (BCC), ICT Division, SUST CSE

Dec 2024 – Jan 2025

Government Initiative

Completed intensive 2-month full-stack development program covering HTML5, CSS3, JavaScript, Node.js, Express.js, MySQL, and Git version control

Developed and deployed a production-ready full-stack web application featuring responsive UI, RESTful API architecture, and integrated database management

Collaborated in team-based projects, implementing agile development practices and code review processes

Gained hands-on experience in frontend/backend integration, deployment strategies, and industry best practices

TECHNICAL PROJECTS

CourseSphere – University Course Registration System

[GitHub](#)

Developed comprehensive course registration platform as Team Lead for university administration with role-based access control for students, advisors, HODs, and administrators

Architected multi-tier authentication system with JWT tokens and automated email notifications for account creation and management across 5 different user roles

Built full-stack application with Next.js, TypeScript, MySQL featuring course browsing, prerequisite verification, payment processing, and real-time registration tracking

Implemented administrative workflows including course approval, financial calculations, result management, and deadline control with automated notifications

SkyTrip – Online Flight Booking System

[GitHub](#)

Engineered full-stack flight booking platform using React.js, Node.js, Express.js, and MySQL with secure JWT authentication

Developed RESTful APIs for flight search by destination, class, and date with real-time seat availability and booking confirmation

Implemented secure payment gateway integration and automated booking confirmation system with seat assignment

Created comprehensive admin panel for managing flight listings, airlines, and viewing booking analytics with complete CRUD operations

Daily-Flow – Task Management Application

[GitHub](#)

Built productivity application using Next.js, MongoDB, and Tailwind CSS with authentication and task categorization features

Developed task management system with create, edit, delete functionality and priority-based organization

Implemented progress tracking with daily, weekly, and monthly views along with search and filter capabilities

Designed responsive interface supporting desktop and mobile devices with intuitive user experience

TextUtils – Text Manipulation Tool

[GitHub](#)

Created React-based text processing application with 10+ utility features including case conversion and character counting

Designed component-based architecture following React best practices with hooks for state management

Implemented real-time text analysis and transformation features with Bootstrap-based responsive UI

PROBLEM-SOLVING & ACHIEVEMENTS

Competitive Programming: Solved 550+ algorithmic problems across multiple platforms with strong foundation in data structures and algorithms

Platforms: Codeforces (Rating: 1183), CodeChef (Rating: 1446), LeetCode (20+ problems)

Core Strengths: Dynamic Programming, Graph Algorithms, Greedy Algorithms, Sorting & Searching, Problem-Solving

PROFESSIONAL COMPETENCIES

Technical: Algorithm Design, Code Optimization, System Design, Testing & Debugging

Soft Skills: Problem-Solving, Team Collaboration, Time Management, Effective Communication, Adaptability
